ITEM NO.6:

FOR APPROVAL OF ENHANCEMENT IN PRESCRIBED LIMIT OF REMUNERATION PAYABLE TO RELATED PARTY'S APPOINTMENT TO ANY OFFICE OR PLACE OF PROFIT IN THE COMPANY.

The Companies Act, 2013 aims to ensure transparency in the transactions and dealings with related parties of the Company. The provisions of Section 188(1)(f) of the Companies Act, 2013 govern the related party's appointment to any office or place of profit in the company, its subsidiary company or associate company

Sri S. Kaushik Ram (President – Business Development) of the Company, son of Sri R.Sarabeswar (Chairman and Whole time Director) has been appointed as officer holding a place of profit under the erstwhile Section 314(1B) of the Companies Act, 1956 at a yearly remuneration of Rs.60.00 lakhs (Rupees Sixty Laks only) and a resolution to this effect was passed by the shareholders on 24th June, 2010, and further the Central Government approval was sought upto a limit of 69,00,000/- (Rupees Sixty Nine Laks only) per annum till 11th June 2016 which was granted vide their letter no.B08973000/4/2011-CL.VII on 31st May, 2011 ("said Approval).

The said approval allowed a total remuneration of, ` 69 Lakhs (Rupees Sixty Nine Lakhs only) per annum for a period from 24-06-2010 to 11-06-2016 for Sri S. Kaushik Ram and further required, the Company to seek fresh approval of the Central Government in the event of increase in remuneration in excess of the aforesaid limit.

By virtue of the Companies Act, 2013 ("Act") which has replaced the Companies Act, 1956, approval of the Central Government is now dispensed with for appointment of a related party to an office or place of profit in the Company. However, in terms of Section 188(1)(f) of the Act read with Rule 15 of the Companies (Meetings of Board and its Powers) Rules, 2014 ("Rules") and General Circular No . 30/2014, the aggregate maximum permissible limit for Remuneration payable to related parties is ` 30 Lakh (Rupees Thirty Lakh only) per annum irrespective of the no. of persons employed and requires the prior approval of the company by special resolution for increasing the same, the Company now seeks prior approval of the shareholders to, enhance the prescribed limit of remuneration payable to related parties appointment to any office or place of profit in the company, as computed under applicable provisions of Companies Act, 2013 and its allied rules from ` 30 Lakhs (Rupees Thirty Lakhs) to ` 60 Lakhs (Rupees Sixty Lakhs) per annum ("Maximum Remuneration") in a Financial Year starting from the Financial Year 1st April, 2016. This Maximum Remuneration shall be inclusive of perquisites, Viz. car, medical insurance, contribution to superannuation fund, provident fund, gratuity, leave travel allowance, Sweat Equity Shares, ESOPS, Securities as defined under Securities Contract (Regulation) Act, 1952 and such other benefits which are payable or applicable to employees in similar senior management cadre and same position in the Company as may be recommended by the Nomination and Remuneration Committee and approved by the Board of Directors, from time to time

In terms of the Listing Regulations and Section 188(1)(f) of the Companies Act, 2013 read with applicable rules, the Company has sought and obtained the approval and consent of the Nomination and Remuneration Committee and the Board respectively for enhancement in prescribed limit of remuneration payable to appointment of related parties to any office or place of profit in the company. The Audit Committee and Board considered the said Maximum Remuneration payable to the related parties appointment to any office or place of profit in the company, to be in the ordinary course of business and at arms' length basis transaction.

Sri S.Kaushik Ram has been associated with the Company for the last ten years and during this period gave his best for its immense growth. His present roles are crucial to provide impetus to the expanding business under this difficult situation in the emerging business scenario in which the Company is operating. He is focusing on tapping the potential markets. Considering his qualification, experience and present role the prescribed limit under the Companies Act is not commensurate, hence approval of the shareholders is sought for enhancement.

However the Nomination and Remuneration Committee and the Audit Committee have approved the remuneration at the same scale (i.e) at Rs60lakhs (Rupees Sixty Lakhs) per annum. No hike is sought for.

The above approval will be valid until decided otherwise.

Except for Sri R.Sarabeswar (Chairman and Whole time Director) and his son Sri S. Kaushik Ram (President – Business Development), none of the other Directors, Key Managerial Personnel or their relatives is, in any way, concerned or interested, financially or otherwise, in this resolution.

The Board recommends the resolution for approval of the members

4. MANAGEMENT DISCUSSION AND ANALYSIS

CONSTRUCTION INDUSTRY OUTLOOK:

Construction Industry Overview

The demand has fallen significantly as the sudden collapse of oil prices in 2015 led virtually every energy company to slow down, postpone, or outright cancel major projects all over the world. Commodity prices have also tumbled, and the mining industry has reduced its capital spending considerably.

The deterioration of energy and commodities markets is in large part a consequence of the skidding economy in China, which had been a major driver of global economic activity and infrastructure projects over the past decade. Anemic and inconsistent growth in developed markets has been unable to make up for the Chinese shortfall and similar weaknesses in other emerging countries. Continuing global economic instability will almost certainly drive E&C sector revenues down in 2016 compared to the year before, stalling the recovery that had followed the previous collapse in spending in the sector during the 2008-09 financial crisis.

That's not to say that there are no bright spots for E&C companies. In the U.S., construction starts were up about 15 percent in 2015 and are forecast to advance another 6 percent this year. Also, infrastructure spending has been neglected since the 2008 recession and some analysts believe that worldwide annual infrastructure spending will grow to more than US\$9 trillion per year by 2025, from a little over \$4 trillion now — that is, if the political will can be mustered to support much-needed improvements.

In addition to the fundamental economic stresses on the E&C sector, established companies face intensifying competition from firms in low-cost nations, which weighs on E&C profit margins and has driven many in the industry to commoditize their services. To make up for it, some E&C companies have turned to a mergers and acquisition strategy centered on acquiring companies offering promising new sources of value in new geographies, new lines of business, or both.

Indian Construction Industry Outlook

Bright prospects for construction industry in India

Increasing investments in residential construction and transport infrastructure will drive growth in India's construction industry over the forecast period (2016–2020), according to a study by Timetric's Construction Intelligence Centre (CIC). Consequently, the average annual growth in real terms is expected to improve from of 2.95% in 2011–2015 to 5.65% during the coming five years.

Timetric's CIC forecasts the industry to rise from a value of US\$428.1 billion in 2015 to US\$563.4 billion in 2020, measured at constant 2010 US dollar exchange rates. Due to industrialization, urbanization, a rise in disposable income and population growth the demand for construction services is set to rise. And also with the smart city projects are put in place with full swing by the Government of India in collaboration with the State Governments the prospects look brighter for the Infrastructure projects in the coming years. Government efforts to improve India's residential and transport infrastructure will also play a vital role in supporting the growth.

Infrastructure construction to pick up

Infrastructure construction accounted for 23.0% of the total industry's value in 2015. According to Timetric's CIC, it will continue to expand over the forecast period, driven by public and private sector investments in public transport infrastructure. Consequently, infrastructure construction is anticipated to be the industry's fastest-growing market over the forecast period, with a CAGR of 9.94% in nominal terms, to value INR9.5 trillion (US\$140.1 billion) in 2020.

"The country's expanding population and urbanisation will continue to generate a need for infrastructure development. To improve trade competitiveness and cope with the population growth, the government is focusing more on infrastructure development, which is expected to result in regular investments in the maintenance and expansion of road infrastructure in the near future."

Residential construction to dominate the industry

Residential construction was the largest market in the Indian construction industry during 2011-2015, and is anticipated to remain relatively sizeable over the next five years, with a 30.6% share of the industry's total value in 2020. Construction activity in the residential market will be supported by rapid urbanization, population growth, and positive developments in regional economic conditions. Government efforts to clear slum areas by 2022 and reduce the country's housing deficit will also help the market grow.

Provisions for Infrastructure sector in Budget 2016-17

Road Transport and Highways: Development of infrastructure particularly the road infrastructure is crucial for accelerating the process of economical development of the country. Keeping this in view, the budgetary support has been stepped to ₹ 55,000 cr. Investments & Government Initiatives: International payment

International investment

Construction Development: Township, Housing, Built-up Infrastructure

Each phase of the construction development project would be considered as a separate project for the purpose of FDI Policy. Construction - Development projects (which include development of townships, construction of residential/commercial premises, road or bridges, hotels, resorts, hospitals, educational institutes, recreational facilities, city and regional level infrastructure, townships) - 100% FDI through automatic route is permitted. The conditions under this sector are:

- (A) (i) The investor will be permitted to exit on completion of the project or after development of trunk infrastructure i.e. roads, water supply, street lighting, drainage and sewerage.
- (ii) Notwithstanding anything contained at (A) (i) above, a foreign investor will be permitted to exit and repatriate foreign investment before the completion of project under automatic route, provided that a lock-in-period of three years, calculated with reference to each tranche of foreign investment has been completed. Further, transfer of stake from one non-resident to another non-resident, without repatriation of investment will neither be subject to any lock-in period nor to any government approval.
- (B) The project shall conform to the norms and standards, including land use requirements and provision of community amenities and common facilities, as laid down in the applicable building control regulations, bye-laws, rules, and other regulations of the State Government/Municipal/Local Body concerned.
- (C) The Indian investee company will be permitted to sell only developed plots. For the purposes of this policy "developed plots" will mean plots where trunk infrastructure i.e. roads, water supply, street lighting, drainage and sewerage, have been made available.
- (D) The Indian investee company shall be responsible for obtaining all necessary approvals, including those of the building/layout plans, developing internal and peripheral areas and other infrastructure facilities, payment of development, external development and other charges and complying with all other requirements as prescribed under applicable rules/bye-laws/regulations of the State Government/Municipal/Local Body concerned.
- (E) The State Government/Municipal/Local Body concerned, which approves the building/development plans, will monitor compliance of the above conditions by the developer.
- (F) No minimum land area requirement in case of development of serviced plots.
- (G) In case of construction-development projects, minimum floor area of 20,000 sq. mts.
- (H) It is clarified that 100% FDI under automatic route is permitted in completed projects for operations and management of townships, malls/shopping complexes and business constructions.

Government Initiatives

The Government of India has recently relaxed FDI policy in 15 sectors, such as raising the foreign investment limit for some sectors, easing the conditions for others and putting many on the automatic route for approval. The sectors that benefited from the relaxation include defence, real estate, private banking, civil aviation, single brand retail and news broadcasting. The new rules provide for easier exit from investment in the construction sector while foreign investment limit in defence and airlines was allowed up to 49 per cent through the automatic route. Banks were allowed fungible FDI investment up to 74 per cent, which means that FII investment in private banks can rise to this limit.

The Government of India plans to further simplify rules for Foreign Direct Investment (FDI) such as increasing FDI investment limits in sectors and include more sectors in the automatic approval route, to attract more investments in the country.

Challenges:

Risks / Current challenges in infrastructure development in India

But the progress of infrastructure development has not been smooth in the recent years, with significant shortfalls in planned investments. This problem is compounded by the fact that many of the announced projects are yet to be completed, with large time and cost overruns. Figures sourced from Government reports reveal that nearly 276 projects out of 566 projects tracked by Ministry of Statistics and Programme Implementation have been delayed. Some estimates of Ministry of Finance peg the worth of delayed projects, due to pending approvals, at ~ INR 1 lakh Crore.

Future growth areas for the sector

The proposed investment over the next five years are ~ INR 56,00,000 Cr, with nearly half expected to come from private players. While sectors like road and power are expected to attract a large share of the proposed investments, newer

opportunities are likely to appear over the next few years. One of the examples of a large planned infrastructure development is the Delhi-Mumbai Industrial Corridor, envisaged to accommodate large industrial zones, development of smart cities and creation of logistics network. Opportunities are also expected to arise in the area of urban infrastructure development, such as large urban transport and water supply projects in urban cities, driven by the rapid pace of urbanization.

Future Outlook of the Industry

Especially on Road Sector

LOOKING BACK

A new contract method holds the key to renewed attempts by the government in drawing private players back to the highways sector. After finding it difficult to award highway sections to private developers, the government shifted from the BOT (build, operate, transfer) model to the government-funded EPC (engineering procurement construction) and introduced the new method — the hybrid annuity model — for projects granted from October 1. Under the new model, the National Highways Authority of India will provide an initial grant up to 40 per cent of the cost and the developer has to chip in with the rest and complete the project.

In August, the Cabinet Committee on Economic Affairs cleared a proposal to allow infrastructure companies to divest 100 per cent of their equity after two years of completion of construction for all projects given under the BOT model, irrespective of when year the contract was handed out.

Data from India Ratings and Research — a unit of Fitch Ratings — shows that 21 highway projects worth Rs 26,000 crore failed to attract bids over the last two fiscals. As a result, NHAI had to fall back on EPC contracts to plug the gap.

Disputes too are hampering completion of projects. Data from the road ministry shows 112 cases involving Rs 25,000 crore were pending under arbitration between the NHAI and developers till end-April 2015. Added to this is the fact that an underdeveloped bond market has forced PPP road projects to mainly depend on debt from commercial banks — Rs 1.67 lakh crore till February 2015, up 384 % from FY08.

LOOKING FORWARD

A challenging target for project awards through the public-private-partnership route is likely to be set for the coming fiscal — at close to 5,000 km of highway sections worth over Rs 45,000 crore. These include bids for the proposed Bharat Mala project that entails road development along the international borders and the country's coastline and the Char Dham connectivity project that envisages linking up the religious tourism circuit.

A bigger challenge is the task of managing project risk in older projects. An estimated 7,500 km of highway projects have being deemed to be at high risk of not being completed, including 5,100 km under construction and 2,400 km operational sections that were awarded mostly between fiscals 2010 and 2012 on the BOT format.

- India has an estimated urban housing shortage of 18.8 Million dwelling units. The housing shortage in rural India is estimated at 47.4 Million units, in 2012.
- Present levels of urban infrastructure are inadequate to meet the demands of the existing urban population. There is need for re-generation of urban areas in existing cities and the creation of new, inclusive smart cities to meet the demands of increasing population and migration from rural to urban areas. Future cities of India will require smart real estate and urban infrastructure.
- The Government of India is in the process of launching a new urban development mission. This will help develop 500 cities, which include cities with a population of more than 100,000 and some cities of religious and tourist importance. These cities will be supported and encouraged to harness private capital and expertise through Public Private Partnerships (PPPs), to holster their infrastructure and services in the next 10 years.
- To provide quality urban services on a sustainable basis in Indian cities, the need of the hour is that urban local bodies (ULBs) enter into partnership agreements with foreign players, either through joint ventures, private sector partners or through other models.

CCCL COMPANY SCENARIO

Performance Highlights

In an adverse environment the company has bagged new orders to the tune of Rs. 65096/- Lakhs and has successfully executed the projects.

Company began the current financial year with an order book which stood at Rs .72016/- Lakhs. The size and structure of the organisation was geared for catering to take up larger projects but with economic slowdown and lower order booking coupled with slower project execution the asset base and the fixed cost structure which was built up affected the company's profitability.

The lower turnover and operating margins in an environment of high interest costs severely affected the Company's profitability. In addition, further litigation and non payments of claims adversely affected the Company's liquidity. Company's revenue growth and profitability was muted in the last few quarters due to order execution-related issues. CCCL's revenue declined in FY 2015-2016 due to slowdown in order execution. Delay due to exogenous factors such as delay in procuring environmental approvals, land acquisition and government decision making have adversely affected performance. Delayed project execution has in turn affected payment from clients and the Company's cash flows. The year under review has seen enhanced working capital requirements. This has been due to clients delaying payments. Amounts due from clients have shot up to Rs. 1001.55/-crores (including retention of Rs.135.83/- Crores.) as the recovery has been slow. In certain cases we have initiated legal action for recovering these dues. Dues from clients for completed major projects to the tune of Rs.72.71/- crores has added to liquidity crunch.

The Infrastructure sector is facing strong headwinds, including slowdown in order booking caused by shortfall in investments in the infrastructure sector, increased commodity prices and high interest rate scenario. As a consequence of certain unexpected developments which were beyond the control of management, mainly delays in decision making by the Company's major clients and delays in settlement of claims, the expected cash flows have not materialized for the Company. These factors coupled with slowdown in Infrastructure industry has resulted in lower turnover, lower operating margins and high interest costs for the Company which has consequently led the Company to incur net loss for the fifth time since its inception.

STEPS TAKEN OR PROPOSED TO BE TAKEN FOR IMPROVEMENT:

Company has taken view of all these factors seriously and to overcome the above challenges, has proactively undertaken the following steps directed at improving its operational efficiencies:

Claims Realisation: Persistent efforts are being made by Company to collect dues and claims. The Company has set up a strategic senior management team to recover dues and claims outstanding from Clients. Total outstanding as of 31st March 2016 is Rs.100155.42/- lakhs (including retention of Rs.13583/- lakhs). Over due outstanding more than 180 days is Rs.16974.64/- Lakhs.

Cost optimization: Over the past 12 months, Company has implemented cost optimization measures such as cutting overheads and rationalization of human resources. Reduction in Working Capital: Insistence on higher advances from customers and better credit terms with suppliers is being negotiated.

Monetization of assets: Company is proactively exploring monetization of assets either at the parent level or in its subsidiaries / step down subsidiaries.

Bidding for Jobs: The Company has been careful in bidding for new jobs and is taking jobs only on a selective basis.

CAUTIONARY STATEMENT

It is explicitly states that some of the statements in the Management Discussion and Analysis report are likely to be forward looking and it may so happen that the actual events or results may differ from what the Board of Directors/ Management perceive in terms of the future performance and outlook due to factors having a bearing on them and which are beyond precise perception. Company's operations may be affected with supply and demand situations, input prices and their availability, changes in government regulations and policies, tax laws and other factors such as Industrial relations, fund constraints and macro economic development.

However, the financial information of the subsidiary companies is disclosed in the Annual Report in compliance with the said circular.

(b) Noble Consolidated Glazings Ltd. (NCGL)

The glazing market being a sub set of the construction industry, the various factors discussed above drastically affected the operations of NCGL. Completion of projects on hand and collection of receivables and optimization of costs had been the priority in 2015-16. With the much awaited economic stability expected in 2016-17 and the resultant market improvement better days are foreseen. The Company has streamlined its operations and expected to perform better in the near future.

(c) CCCL Infrastructure Ltd.

(e) CCCL Power Infrastructure Limited

Though the Power sector has seen a fall in the recent years, the Company has strived to perform to its full potential, but due to various factors the Company struggled to perform to the mark. However, electricity demand in the country has increased rapidly and is expected to rise further in the years to come. In order to meet the increasing demand for electricity in the country, massive addition to the installed generating capacity is required. The Government of India's focus on attaining 'POWER FOR ALL' has accelerated capacity addition in the country. At the same time, the competitive intensity is increasing at both the market and supply sides. The Company is eyeing a positive trend in the coming years and is optimistic of a revival to this sector.

The Company has streamlined its operations and expected to perform better in the near future.

A Statement Pursuant to first proviso to sub-section (3) of section 129 read with rule 5 of Companies (Accounts) Rules, 2014 containing salient features of the financial statement of subsidiaries/associate companies/joint ventures in **Form AOC-1** is annexed to this report as "**Annexure A**".

6. OPPORTUNITIES

Construction opportunities have almost doubled for this period from the infrastructure projects lined up across various sub-segments of Power, Roads, Railways, Irrigation & water supply, Ports and Airports. There is a long-term demand for quality infrastructure construction, mainly emanating from housing, transportation and urban development segments that far exceed the supply, even though there has been a substantial increase in the number of contractors and builders, especially in housing and road construction segment.

7. THREAT PERCEPTION

Challenges:

- Despite the prospects, the sector continues to face challenges from land acquisition issues, adverse political and structural changes, shortage of talent, design and constructability issues, and rising material and labor costs. However, the land acquisition and environment related issues are being addressed on war footing basis to ease the constraints.
- Policy bottlenecks, slow clearance of projects and rising inflation have dampened private sector sentiments and have stifled investments in Capital expenditure. A high level committee has been constituted for speedy clearance of stalled projects and monitoring the implementation.

- Working capital cycle has been elongated mainly due to stretched receivables, which has affected the cash flow position of the companies in the sector. Many of the companies have been forced to draw their full limits with the Banking system or restructure the facilities.
- Lengthy dispute resolution mechanism in the sector is yet another major factor affecting the cash flows of the construction companies.
- This coupled with rising interest rates have led to a drop in the PAT margin and deterioration of debt coverage ratios of construction companies.
